vedangwartikar17@gmail.com | +91-8793103499

## EDUCATION

### SAVITRIBAI PHULE PUNE UNIVERSITY

(Formerly University of Pune)

#### BE IN COMPUTER ENGINEERING

2016 - 2020 | Pune, India

First Class with Distinction

GPA: 8.76 / 10.0

Final Year GPA: 9.59 / 10.0

LeetCode:// [vedangwartikar](https://leetcode.com/vedangwartikar)

HackerRank:// [vedangwartikar17](https://www.hackerrank.com/vedangwartikar17)

## PROGRAMMING SKILLS

Proficient:

Python • Docker • UNIX/Linux • ML/AI

• C/C++ • Git • MySQL • PostgreSQL

Expert:

R • Shell Scripting • Java • JavaScript

• Drupal • HTML/CSS

Familiar:

Tensorflow • ReactJS • Ansible • RegEx

## ACHIEVEMENTS

- Received a **Bravo Award** at **Persistent** for developing a tool that substantially reduced the team's manual efforts

- Winner of Tech-Rex Quiz** organized under **CSI** (Computer Society of India)

- Top 5% (out of 500K people)** in GIT Assessment (LinkedIn)

- LeetCode**: Solved over 250+ Problems

- HackerRank**: 5 Stars (Gold Badge) in Problem Solving and Python

## PUBLICATIONS

## EXPERIENCE

### PERSISTENT | SOFTWARE ENGINEER

November 2020 – Present | Pune, India

- Developing a tool in Python to validate the currency (availability) of open-source packages on IBM's Power8 machines with ppc64le architecture
- It is configured to use detached docker containers to automate the process of installing/building/testing open-source packages from a variety of languages and frameworks and has reduced the team's manual effort by over 80%
- The tool is being integrated with other software products and used across multiple teams because of its time-saving and cost-effective nature

### SIRPI | DATA SCIENCE INTERN

August 2020 – November 2020 | Bangalore, India

- Responsible for the development of Wind Shear Application, built using R, Shiny Framework and AWS Stack, which uses machine learning techniques to predict windspeeds at target heights and is being used by Wind Engineers
- Built an end-to-end Business Chatbot using R frameworks and Plumber APIs with Twilio endpoints along with a Shiny based interactive admin dashboard UI
- Engaged in client communication, presentations and setting up tasks internally for efficient workflow

### RHYTHMFLows | SOFTWARE ENGINEERING INTERN

May 2020 – August 2020 | Pune, India

- Mentored and lead a small team of 4 for an Analytics product developed in-house using R for bank reconciliation
- Implemented a generic library to check reconciliation status for large scale transactions of different business entities using Python, Django, ORM based SQLAlchemy. It helps in analyzing patterns for fraudulent transactions
- Worked on an API-Hub which provides uniform and secured handling of API push/pull requests from multiple banking entities

### PERSISTENT | PROJECT INTERN

June 2019 – June 2020 | Pune, India

- Built a centralized **Virtual Lab Assistant**  which reduces the manual interventions of a computer lab assistant by automating the workflow

## PROJECTS

### FILE SYSTEM EMULATOR

UNIX system internals using C

The FSE provides all the necessary UNIX file subsystem functionalities like bash commands and system call implementations through a customized shell

### DRONE SURVEILLANCE SYSTEM

Object detection using Deep Learning

The DSS can detect the presence of crowd from the proximity of pedestrians using a trained Keras RetinaNet ML model

### PROCESS MONITORING TOOL

Windows system internals using C++

ProcMon provides a detailed log of all the .exe files on a Windows machine and can be used to list memory/thread/system info or kill a specific process
